---

**BACK END DEVELOPMENT:** Java, C++, SQL

**FRONT END DEVELOPMENT:** HTML, CSS, Javascript

**Certifications:** IBM Cybersecurity Analyst Certification (On-Going)

**Skills:** Team Player, Critical Thinking, Problem-Solving, Deliver Results

## PROJECTS

---

### SOS Game

- Developed a game app similar to tic-tac-toe that enables a user to either play with another human or an AI computer
- Utilized the agile development process to quickly iterate and implement new product requirements

### Media Library Collection

- A library collection that uses a menu interface to displaying various options, such as displaying movie, book, and song titles.
- Implemented features to allow users to find titles for movies, actors/actresses, ratings, etc.

### Pharmacy Database

- A database designed to store information related to patients, doctors, prescriptions, pharmacies, pharmaceuticals, drugs, etc.
- It provides a comprehensive structure to manage the relationships between patients, their respective doctors, and the medications prescribed.
